

SPARE WHEEL AND CARRIER

APPLICATION

This inspection applies to all vehicles fitted with a spare wheel or carrier.

PROCEDURE AND STANDARDS

Check the spare wheel and carrier are secure, free from damage, and are correctly positioned.

REASONS FOR FAILURE

	Deficiency Category
1. A spare wheel carrier:	
a. Not in proper condition.	MINOR
b. Insecure, damaged or incorrectly positioned but not so that either is likely to fall from the vehicle.	MAJOR
c. So insecure, damaged or positioned that it is likely to fall from the vehicle.	DANGEROUS
2. A spare wheel:	
a. Insecure, damaged or incorrectly positioned but not so that it is likely to fall from the vehicle.	MAJOR
b. So insecure, damaged or positioned that it is likely to fall from the vehicle or cause damage to the electrical wiring, other vehicle components or passenger luggage, or is likely to injure occupants.	DANGEROUS
