

BODY CONDITION

INFORMATION

This part of the examination applies to all vehicles.

METHOD OF INSPECTION

Examine the bodywork and its components for excessive corrosion or damage resulting in sharp edges, which are likely to cause injury.

This inspection includes:

- all body panels, including doors
- undertrays
- spoilers
- mirror housings

REASON FOR REJECTION

	Deficiency Category
1. A sharp edge or projection, caused by corrosion or damage, which renders the vehicle dangerous to other road users, including pedestrians.	DANGEROUS
2. A body panel, door or body component damaged, corroded or insecure and likely to cause injury when grazed or contacted	MAJOR

Note:

This section refers to body and components, which are non-load bearing.
