REF: Statement of case for Road abandonment order
To whom it may concern,

I have lived here since 2022. I, along with my husband and children use the Green road and Mullydoo Road's daily for walks and exercise. This not only improves our physical health but also our mental health. Our children adore being outside in the fresh air and learning about nature from us. Knowledge that has been passed down through the generations. We do not wish for this to end with our generation.

As well as this, walking this road brings us the great benefit of meeting our neighbours who also use it – we never know who will meet and be able to socialise with.

I would implore you to come here, walk these roads, take in the natural beauty and ask yourselves, if you lived here, would you want it destroyed? Would you want a toxic processing plant, toxic tailings ponds and all the toxicity that goes along with it?

There is evidence in abundance as to why the planning applications of Dalradian Gold, to include the abandonment of historic Green Road should not be passed. I should not need to repeat it here, but it will be an utter shame and loss to the public, and historians if the abandonment of this road is to come to fruition. On a personal note, I will have no where to walk with my children from my home, the gradient in the other direction is too steep for a buggy and too difficult for young children not in a buggy. If this were to go ahead, I would have to drive somewhere else to go for a walk with them, this idea really beggars belief.

I appreciate you taking time to read my letter. I hope and pray for sense to prevail.

Yours sincerely,

██████████
