Introduction

This Traffic and Travel Information (2014) Report is a composite document, comprising the following:

Part 1: Traffic Census data.

Part 2: Information on Variation in Traffic Flows.

Monitoring of the road network is a key activity contributing to the achievement of the Transport NI mission statement:

“Our mission is to facilitate, in a sustainable way, the safe movement of people, goods and services for the social and economic benefit of all people in Northern Ireland.”

The collection of traffic data contributes to the effective management of the road network by providing information that assists in the allocation of TransportNI’s financial resources, the development of future proposals for the network and the planning of Winter Service provision. Traffic data is collected from 351 automatic traffic counting sites located throughout the road network in Northern Ireland.

The overall change in traffic using the network between 2013 and 2014 has been calculated to be 1.42 %.

Any enquiries about this report or the availability of additional traffic flow information should be addressed to:

PART 1

ANNUAL TRAFFIC CENSUS REPORT

2014

General Information relating to Part 1 – Traffic Census

1.1 Part 1 of this report contains detailed information relating to traffic flow collated from 351 census points on the road network in Northern Ireland.

1.2 These census points are located on both the main and minor road networks.

Information is based on the best available data gathered during the course of a year and from this an annual average is calculated.

1.3 TransportNI has an ongoing programme to upgrade sites to continuous monitoring.

Currently there are 242 continuously monitored sites. These sites provide information on seasonal and annual variations in traffic flow. In Tables 1, 2 and 3 these sites are identified by an 'X' in the column headed "365 days".

1.4 TransportNI classifies vehicles using the DoENI5 system of classification.

Class 1 Car, Car & Trailer and Light Van

Class 2 Medium Goods Van and Minibus (<8.7m)

Class 3 Rigid Heavy Goods Vehicle (>8.7m)

Class 4 Articulated Vehicle and Rigid Heavy Goods Vehicle & Trailer

Class 5 Bus and Coach

1.5 The following notes are intended as clarification of the Traffic Census information contained in Tables 1, 2, 3, 4 and 5.

- (a) Tables 1, 2 and 3 are included as "location finders". In Table 1 the sites are listed in route number order (i.e. the road classification number). Table 2 contains the same information, listed by TransportNI Division. Finally Table 3 also contains the location of the counting sites, listed by Census Point (CP) number.
- (b) Tables 4 and 5 provide the traffic volumetric data arranged by Census Point number. These tables also include route numbers and site locations.
- (c) Within the tables the term "Channel" relates to the direction of flow of the traffic. Traffic at each site is normally counted in two channels, each channel representing a direction of flow. An exception to this is where there is only one way traffic flow.
- (d) Traffic flow volumes greater than 10 are rounded to the nearest multiple of 10.

- (e) 24 hour Annual Average Daily Traffic (AADT) flows are calculated using data from the 7 day week.
- (f) “Mean Peak Hour Flow” is the average peak hour flow based on a 5 day week comprising Monday to Friday inclusive.
- (g) % HGV is the percentage of the AADT in classes 3, 4 and 5.
- (h) Some cells within the tables are marked “-”. This means that either the data was considered to be unreliable or no information was available at that site.
Unidirectional sites have a “N/A” for the non-existent second channel.
- (i) Maps showing the locations of the census points are included in Appendix A of this report.

Table 1 - Site Location Details (Listed by Road Number)

This table contains the same information as Tables 2 and 3 but each is sorted differently for ease of reference.

Table 4 – Summary table (tables 5A & 5B)**2014 Average Annual Daily Traffic Flow (AADT) (7 day) and Mean Weekday Peak Hour Flows (5 day)**

This table contains the Average Annual Daily Traffic (AADT) flows (7 day) based on traffic flows over the seven day week and the percentage of Heavy Goods Vehicles (%HGV) for each site which is the percentage of the AADT in classes 3, 4 and 5. (See Table 5A for a breakdown by class). The table also contains the weekday average peak hour flows (5 day) and the time that the peak hours commence. The flows are for both directions of travel combined. The sites are listed in order of Census Point Number for ease of reference.

Table 5A – 7 day Annual Average Directional Flows and Percentage Composition of Traffic

The Vehicle Classification system used by TransportNI is shown in the following table. There are five classes. Motorcycles are not recorded in the classification.

Vehicle Class	Description
Class 1	Car, Car & Trailer, Light Van
Class 2	Medium Goods Van or Minibus (<8.7m long)
Class 3	HGV Rigid (>8.7m long)
Class 4	Articulated Vehicle & Rigid HGV with trailer
Class 5	Bus & Coach

Table 5A contains the 7 day Annual Average Daily Traffic flow (AADT) by direction and the percentage composition of the AADT. The sites are listed by Census Point number.

Table 5B – 5 day Directional Flow Information

Table 5B contains the weekday flows (5 day) for both directions of travel and a combined total, where appropriate. The peak hour flows are also given by direction, together with the start time of each peak hour.

The sites are listed in order of Census Point Number for ease of reference.

PART 2

VARIATIONS IN TRAFFIC FLOW

General information relating to Part 2 – Variations in traffic flow

2.1 Tables 6 and 7 provide information on changes in recorded traffic flows over recent years. Table 6 gives the Annual Average Daily Traffic (AADT) (7 day) figures from 2004 - 2014. Table 7 includes percentage changes in traffic volumes (7 day) between 2010 and 2014.

2.2 The following are points of clarification regarding Tables 6 and 7.

- (a) CP 225 was decommissioned in 2014 as it has not been possible to install a replacement counter due to its location on King's Bridge.
- (b) CP 437 – Newry By-Pass (Stage 1) – As a result of the new Newry By-Pass, traffic flow has dropped considerably at this location from 2010 onwards.
- (c) CP 438 – Newry By-pass (Stage 2) – As a result of the new Newry By-pass, traffic flow has dropped considerably at this location from 2010 onwards.
- (d) CP 536 has been added to the 2014 Traffic Census Report.
- (e) CP 607 – Ballygawley Road, West of Woodlough Road – Drop in traffic flow due to the opening of the new A4 dual carriageway in 2010.
- (f) CP 608 – Ballygawley to Aughnacloy (South of A4 junction) – This census point has been removed. It has been replaced with CP 675 – A5 Tullyvar Road, Ballygawley.
- (g) CP 609 – Augher to Ballygawley (West of A5 junction) – This census point has been removed. It has been replaced with CP 676 – Annaghilla Road, between roundabout and U317.
- (h) CP 659 – Strabane By-Pass Stage 2. This location supercedes CP 647 (A5 – Bradley Way).
- (i) All other cells within tables 6 and 7 that are marked “-” means that either the data was considered to be unreliable or no information was available at that site.
- (j) Due to counter problems there is no 2014 data available for sites 157, 233, 342, 374, 376 and 392.

2.3 The changes in traffic flows between 2013 and 2014 for the various classes of road are shown in Table 8.

Table 6 – Annual Average Daily Traffic (7 day) from 2004 to 2014

This table contains the Annual Average Daily Traffic flows (7 day) for each site for each year. The sites are listed in order of Census Point Number.

Table 8 - Variation In Traffic Flow (7 day) between 2013 and 2014

The change in traffic flow (7 day) 2013 – 2014 has been calculated for all sites and by road classification as shown in the table below. Route A12 (Westlink) was included with the motorway sites as it connects two motorways. The following table shows the findings.

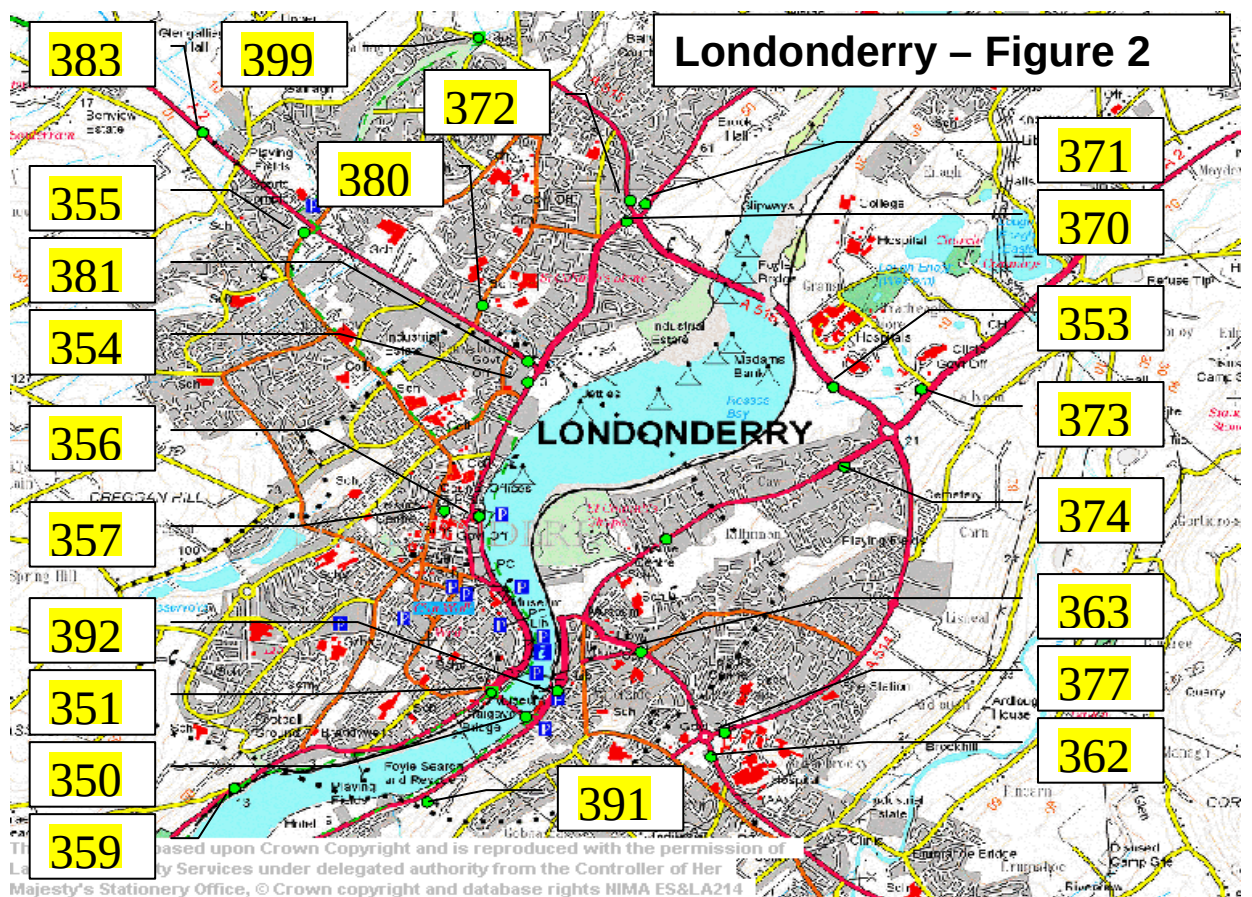

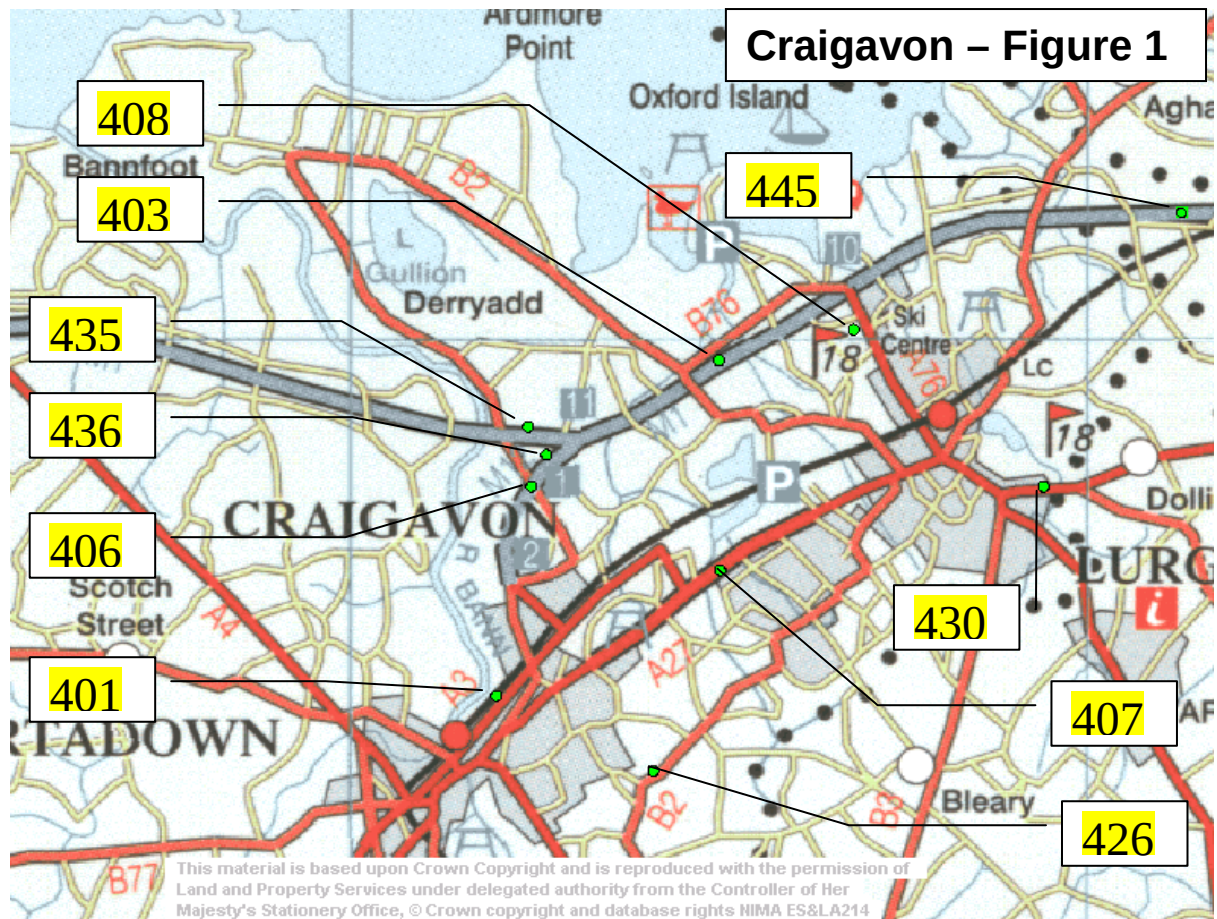

Table 8		
Route type	Change 2013 – 2014	Number of sites
Motorways (Incl. A12 Westlink)	1.98 %	24
A Class routes	1.25 %	245
B Class routes	1.45 %	46
C Class and Unclassified routes	1.50 %	36
Overall Total	1.42 %	351

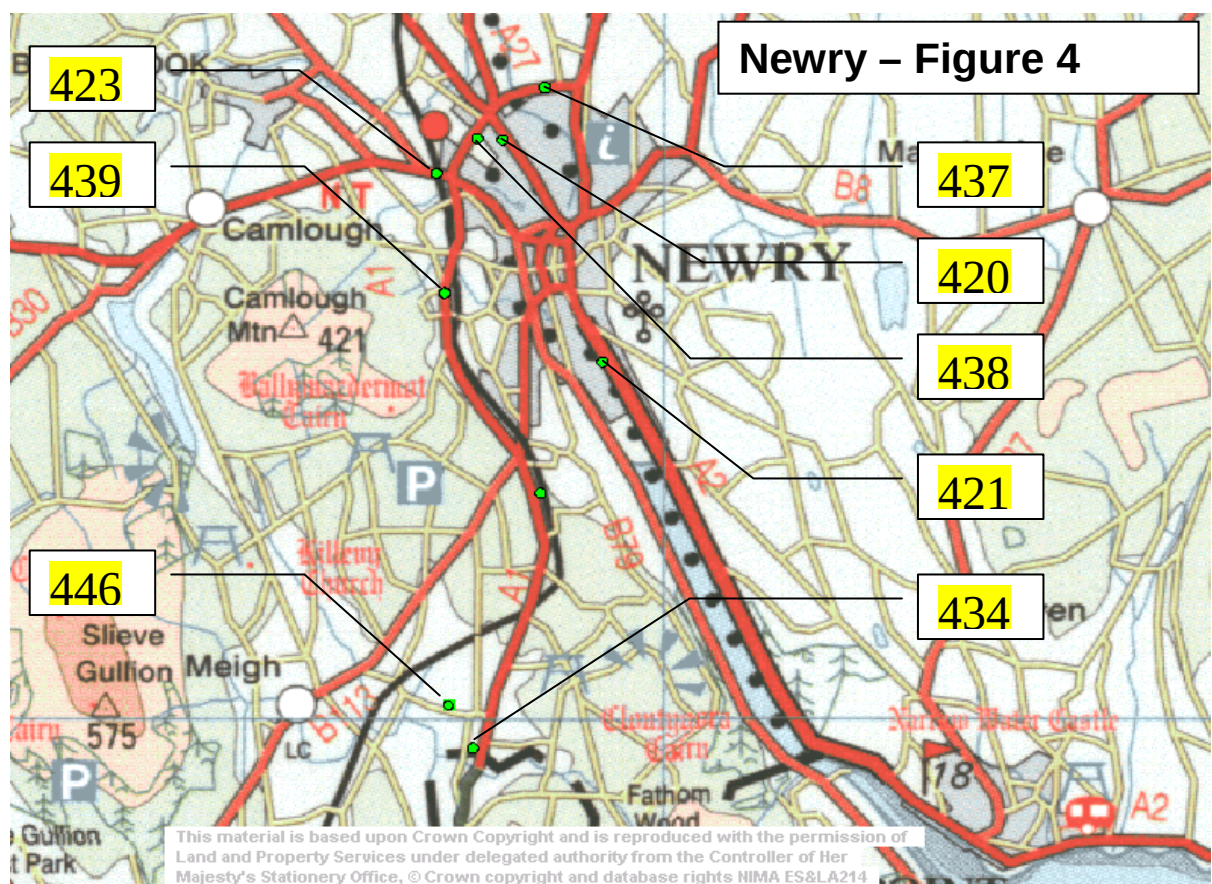

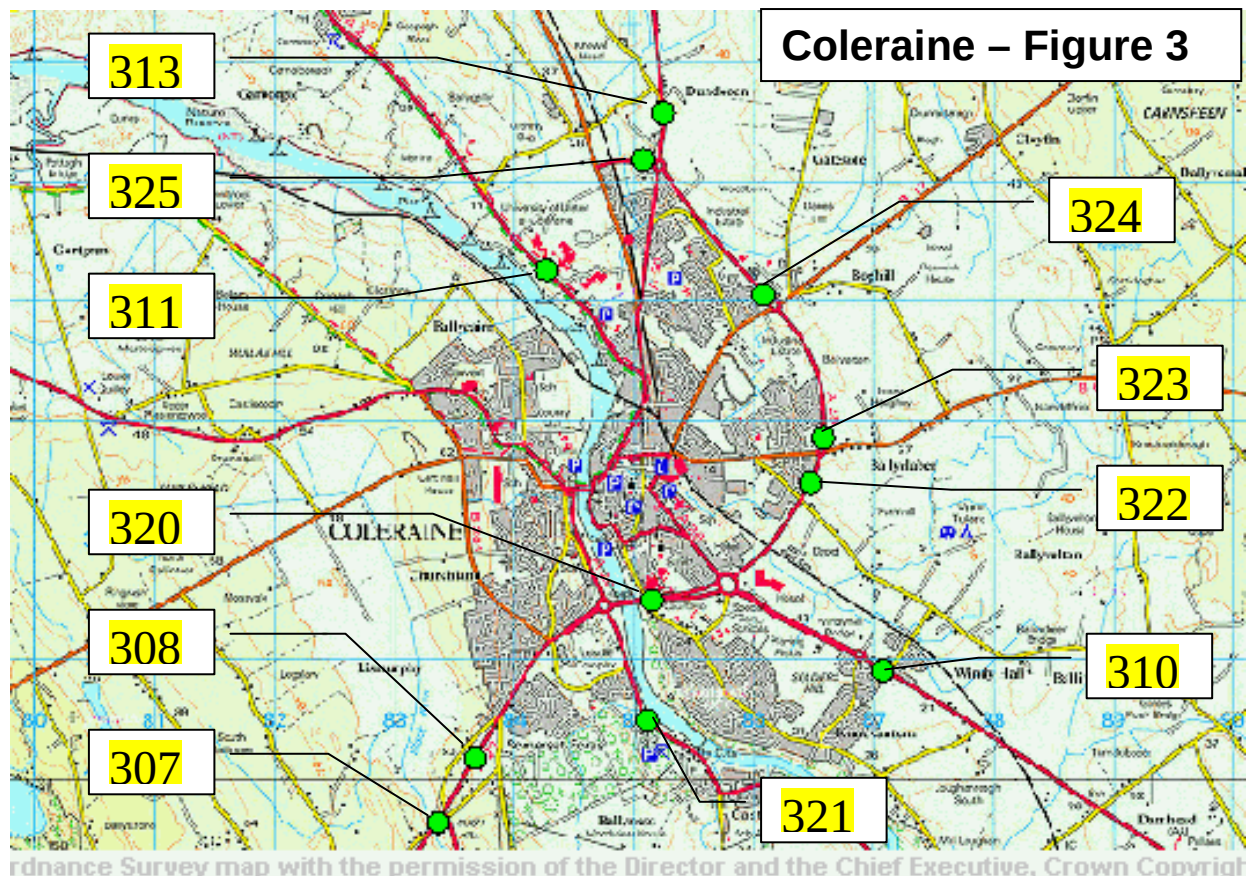

APPENDIX A

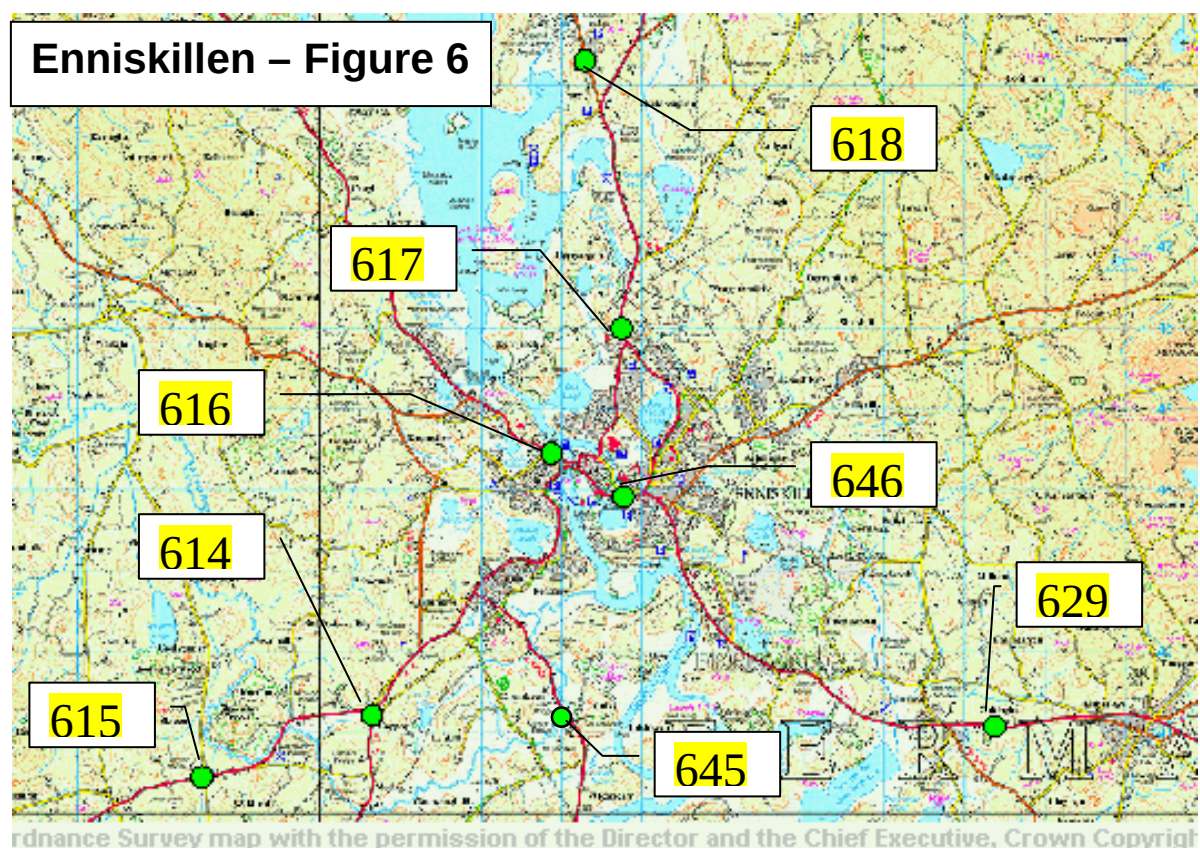

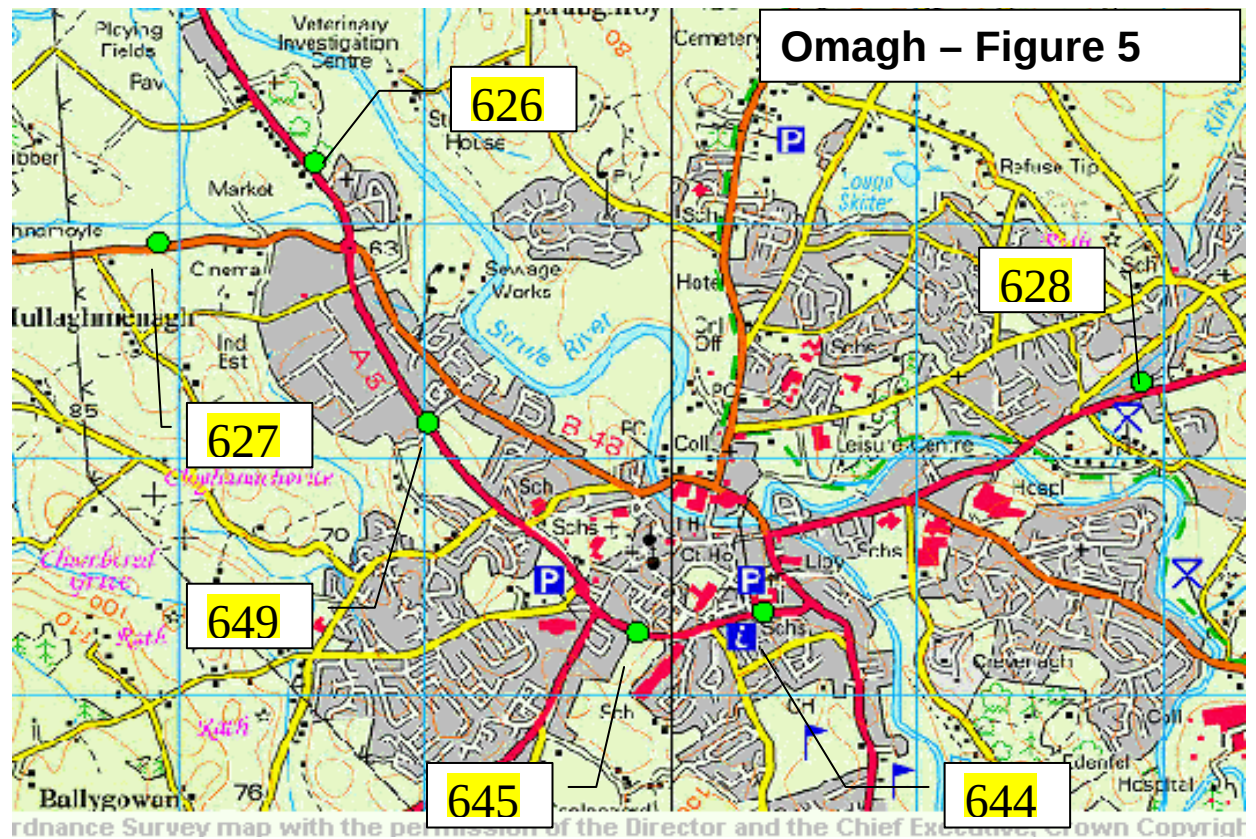

Location of Census Points

Appendix A Location of Census Points

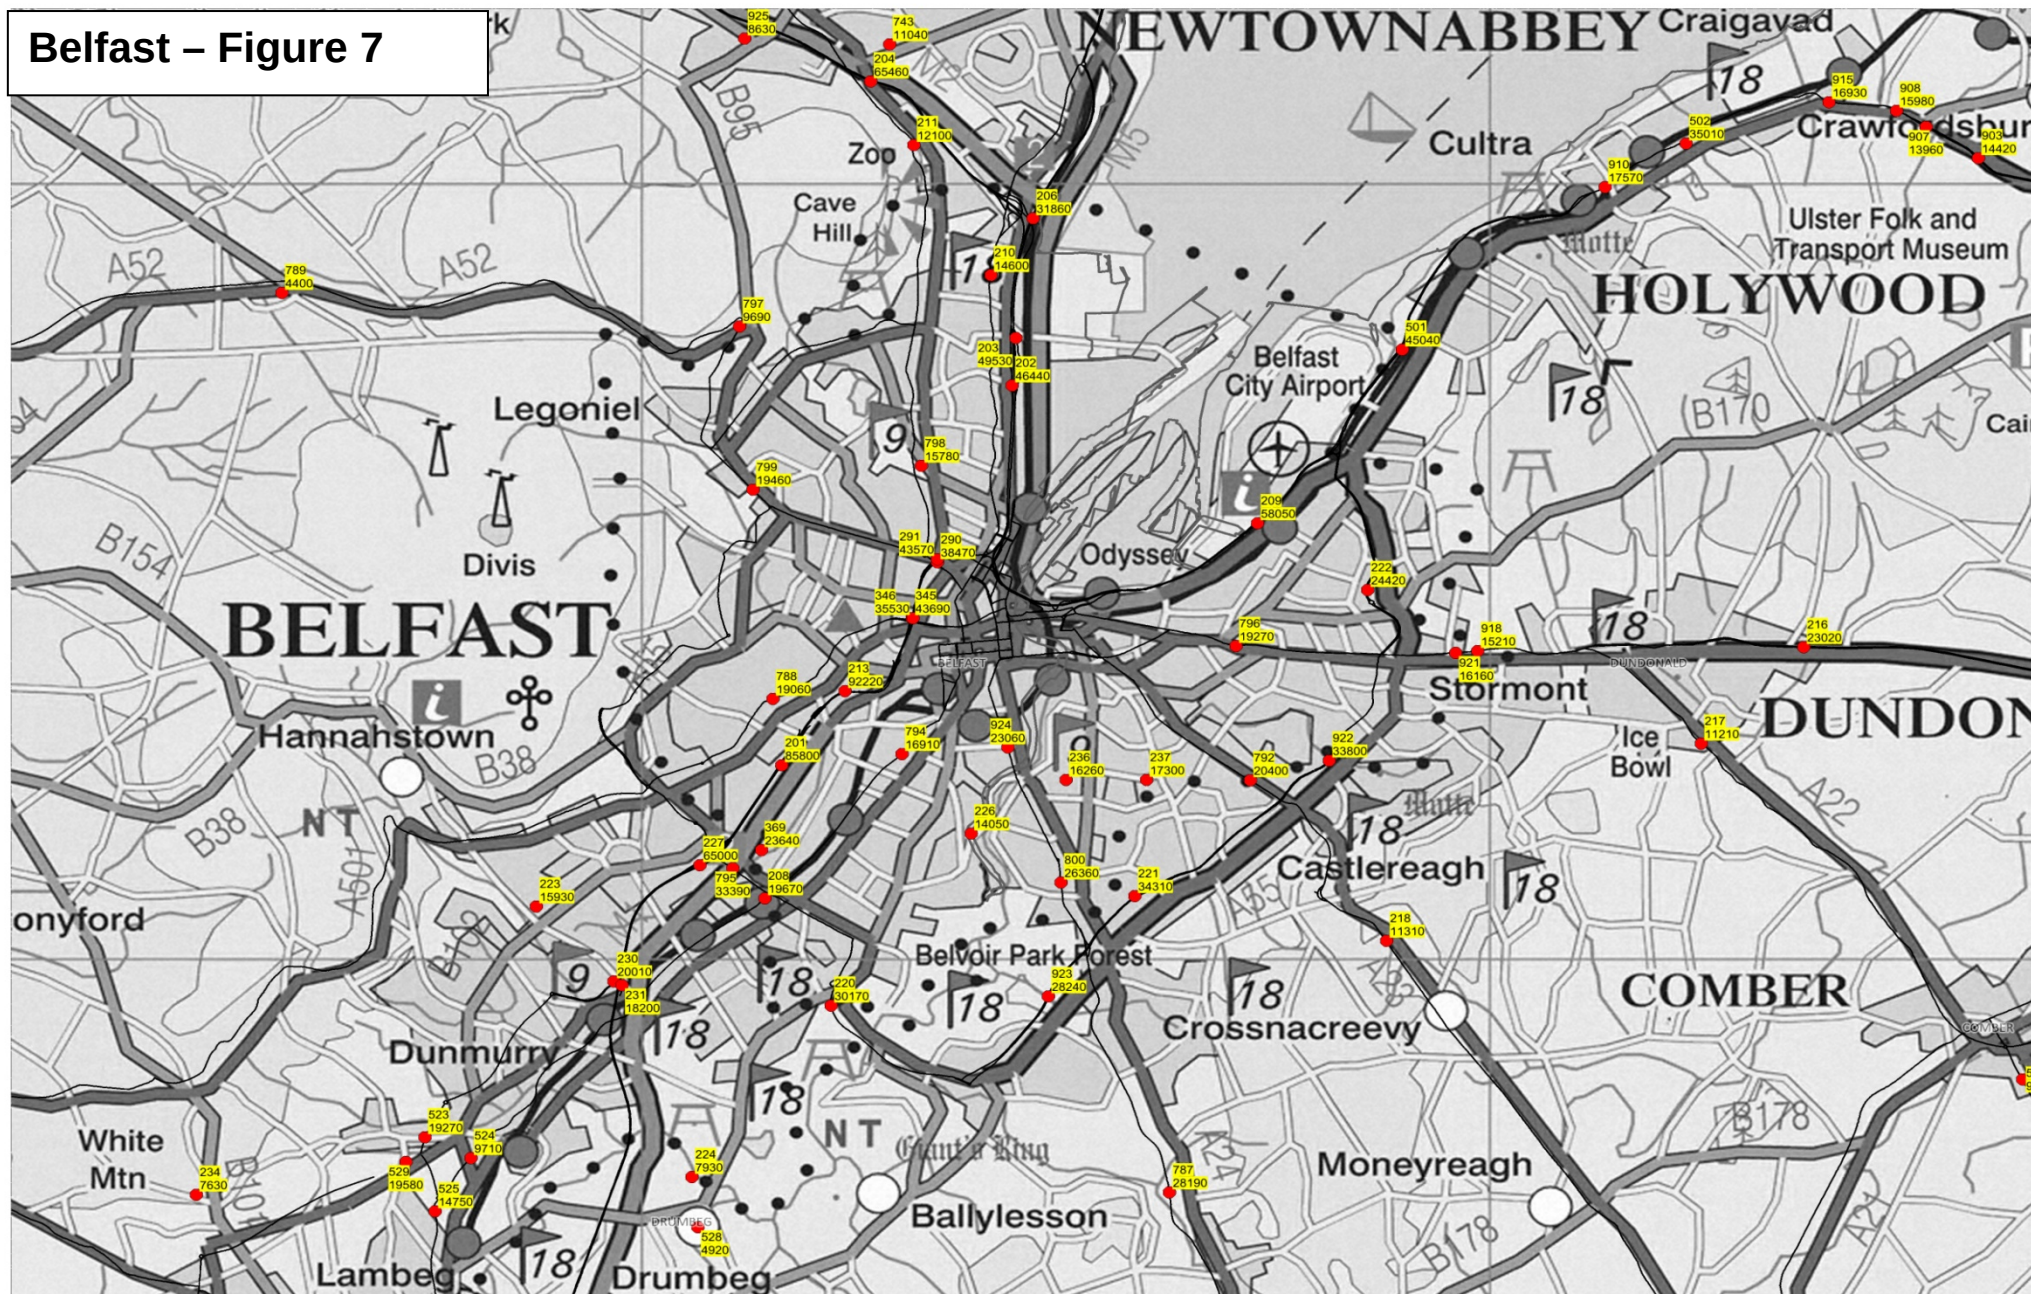

1. The maps contained in Appendix A show the locations of the Census Points from which the information in the report has been derived.
2. Figures 1 to 7 show Census Point locations in Craigavon, Londonderry, Coleraine, Newry, Omagh, Enniskillen and Belfast.
3. Figure 8 shows location of Census Points and Annual Average Daily Flows throughout Northern Ireland.

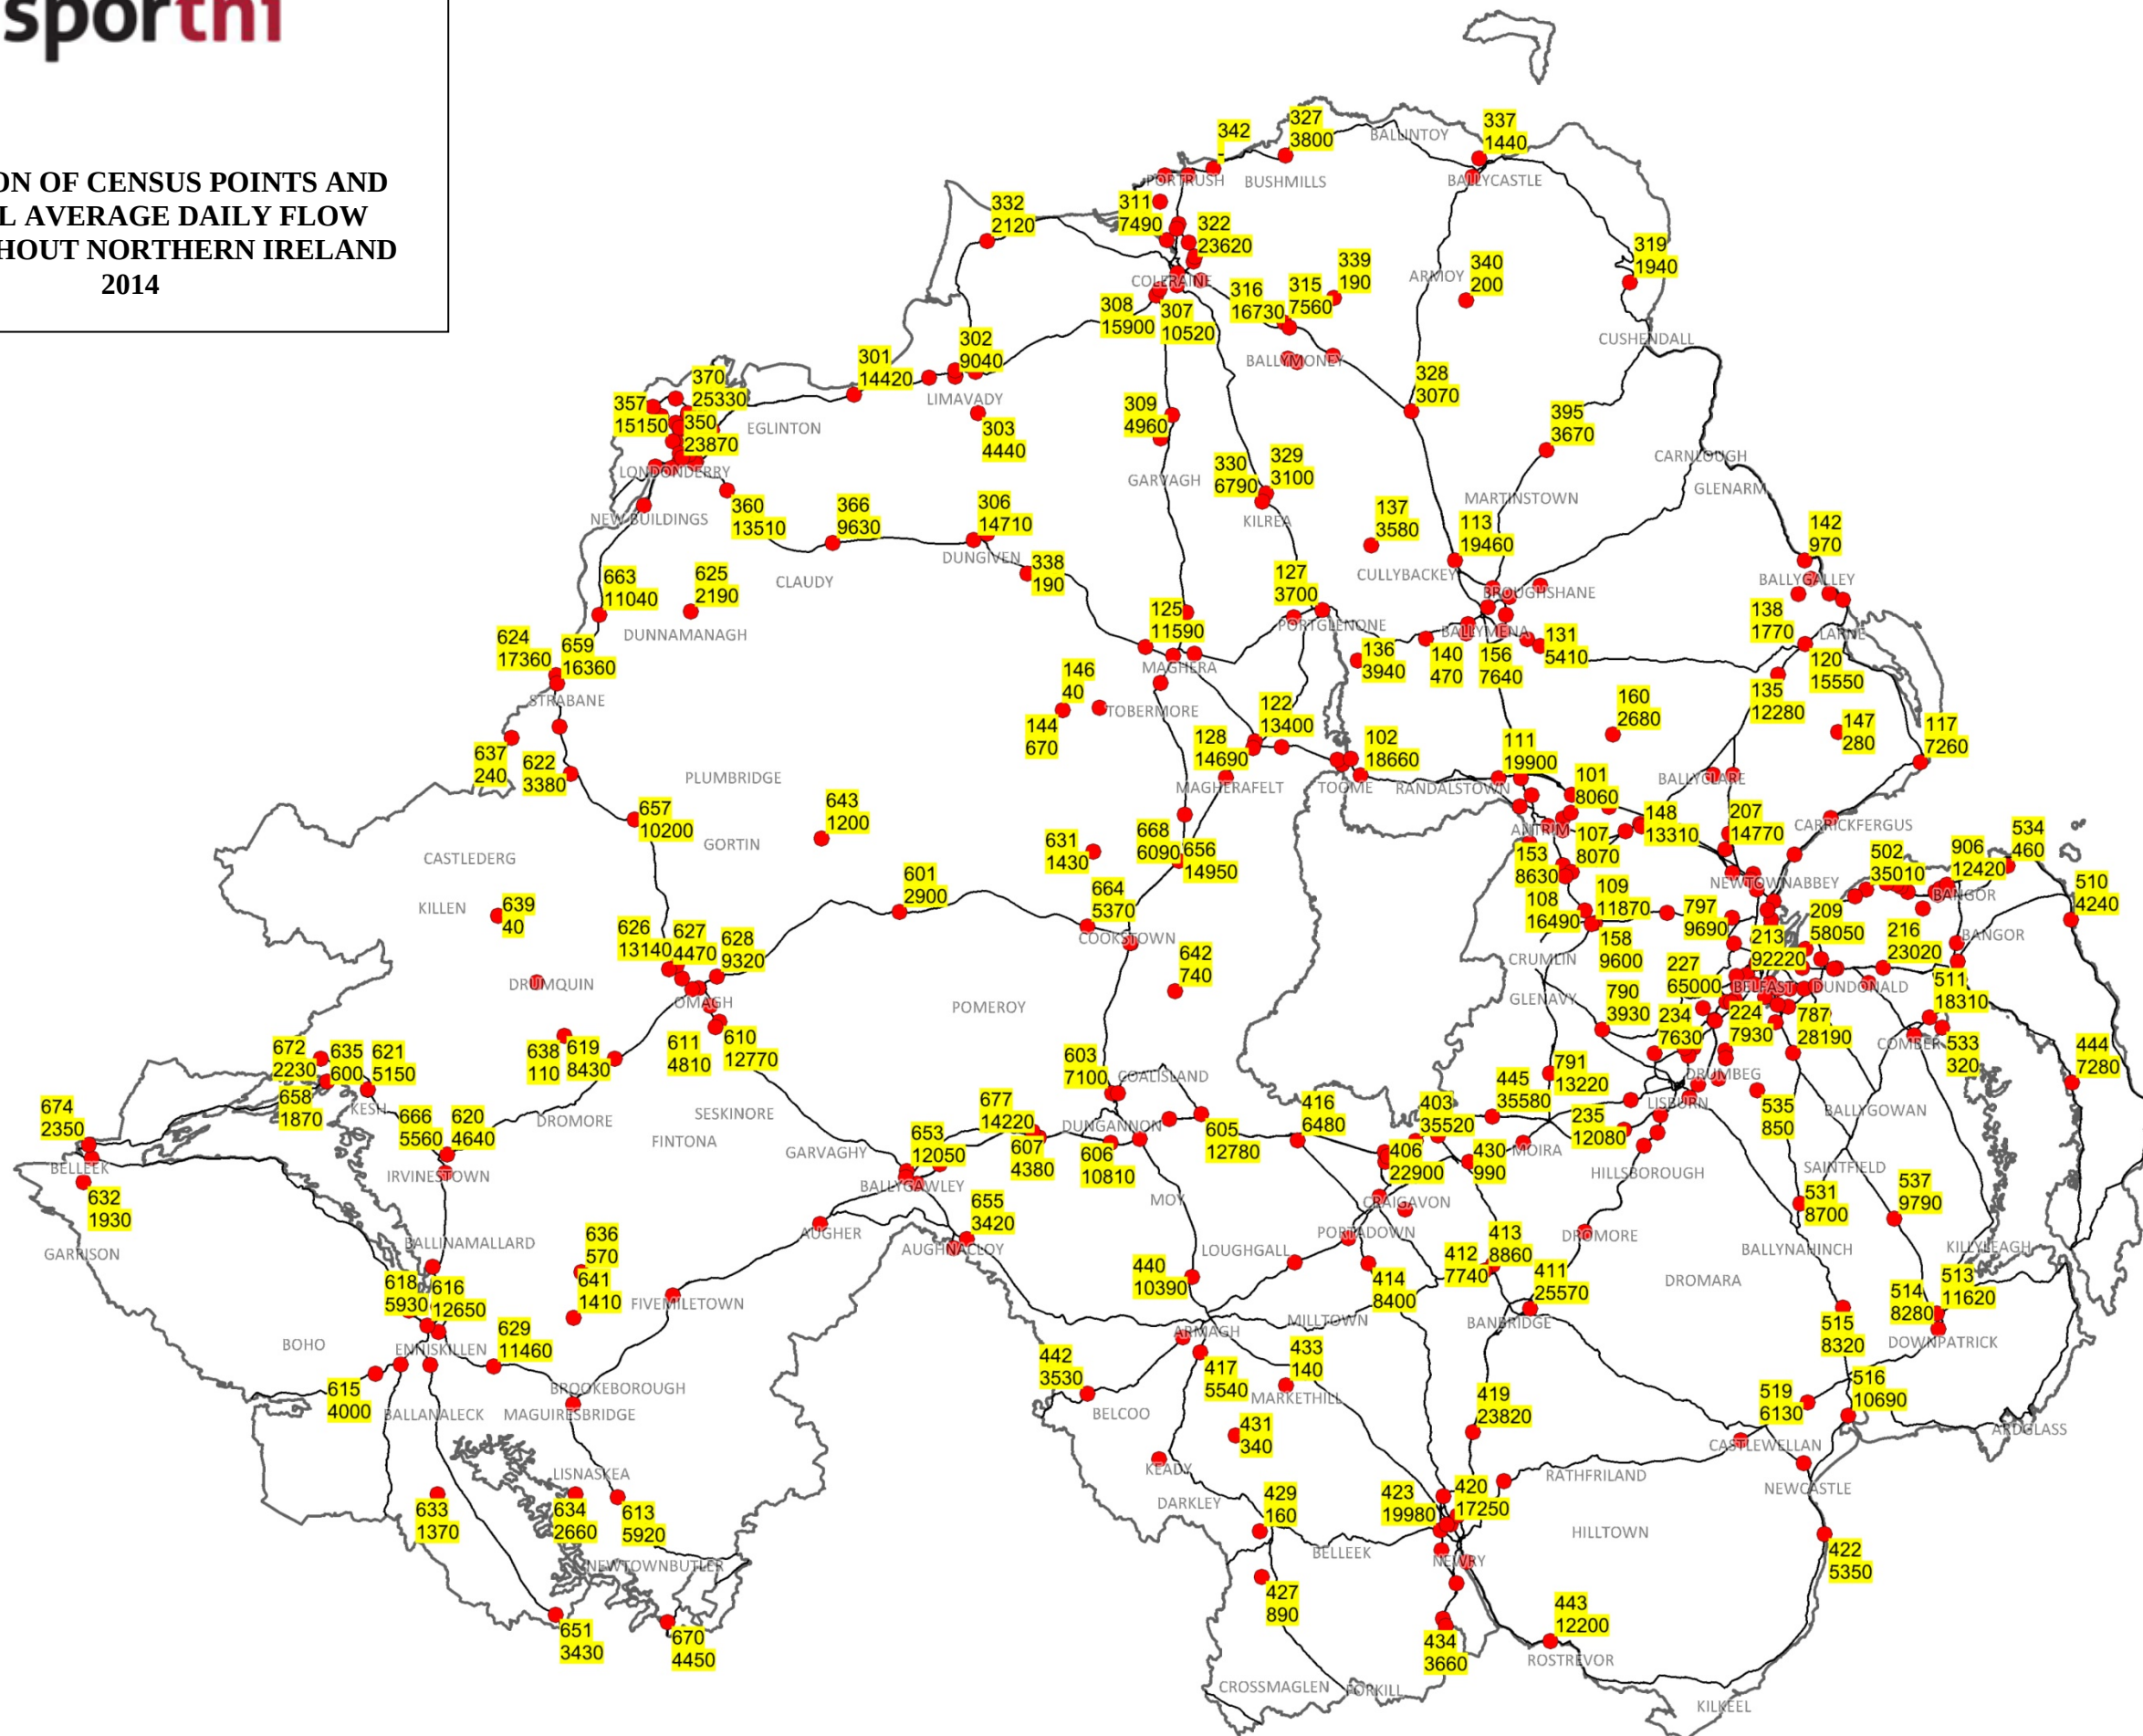

Belfast – Figure 7

LOCATION OF CENSUS POINTS AND ANNUAL AVERAGE DAILY FLOW THROUGHOUT NORTHERN IRELAND 2014
