[REDACTED]

Please see attached, can you provide a drawing and swept path showing a kerblineline that will allow safe access and egress for a 7.5T box lorry.

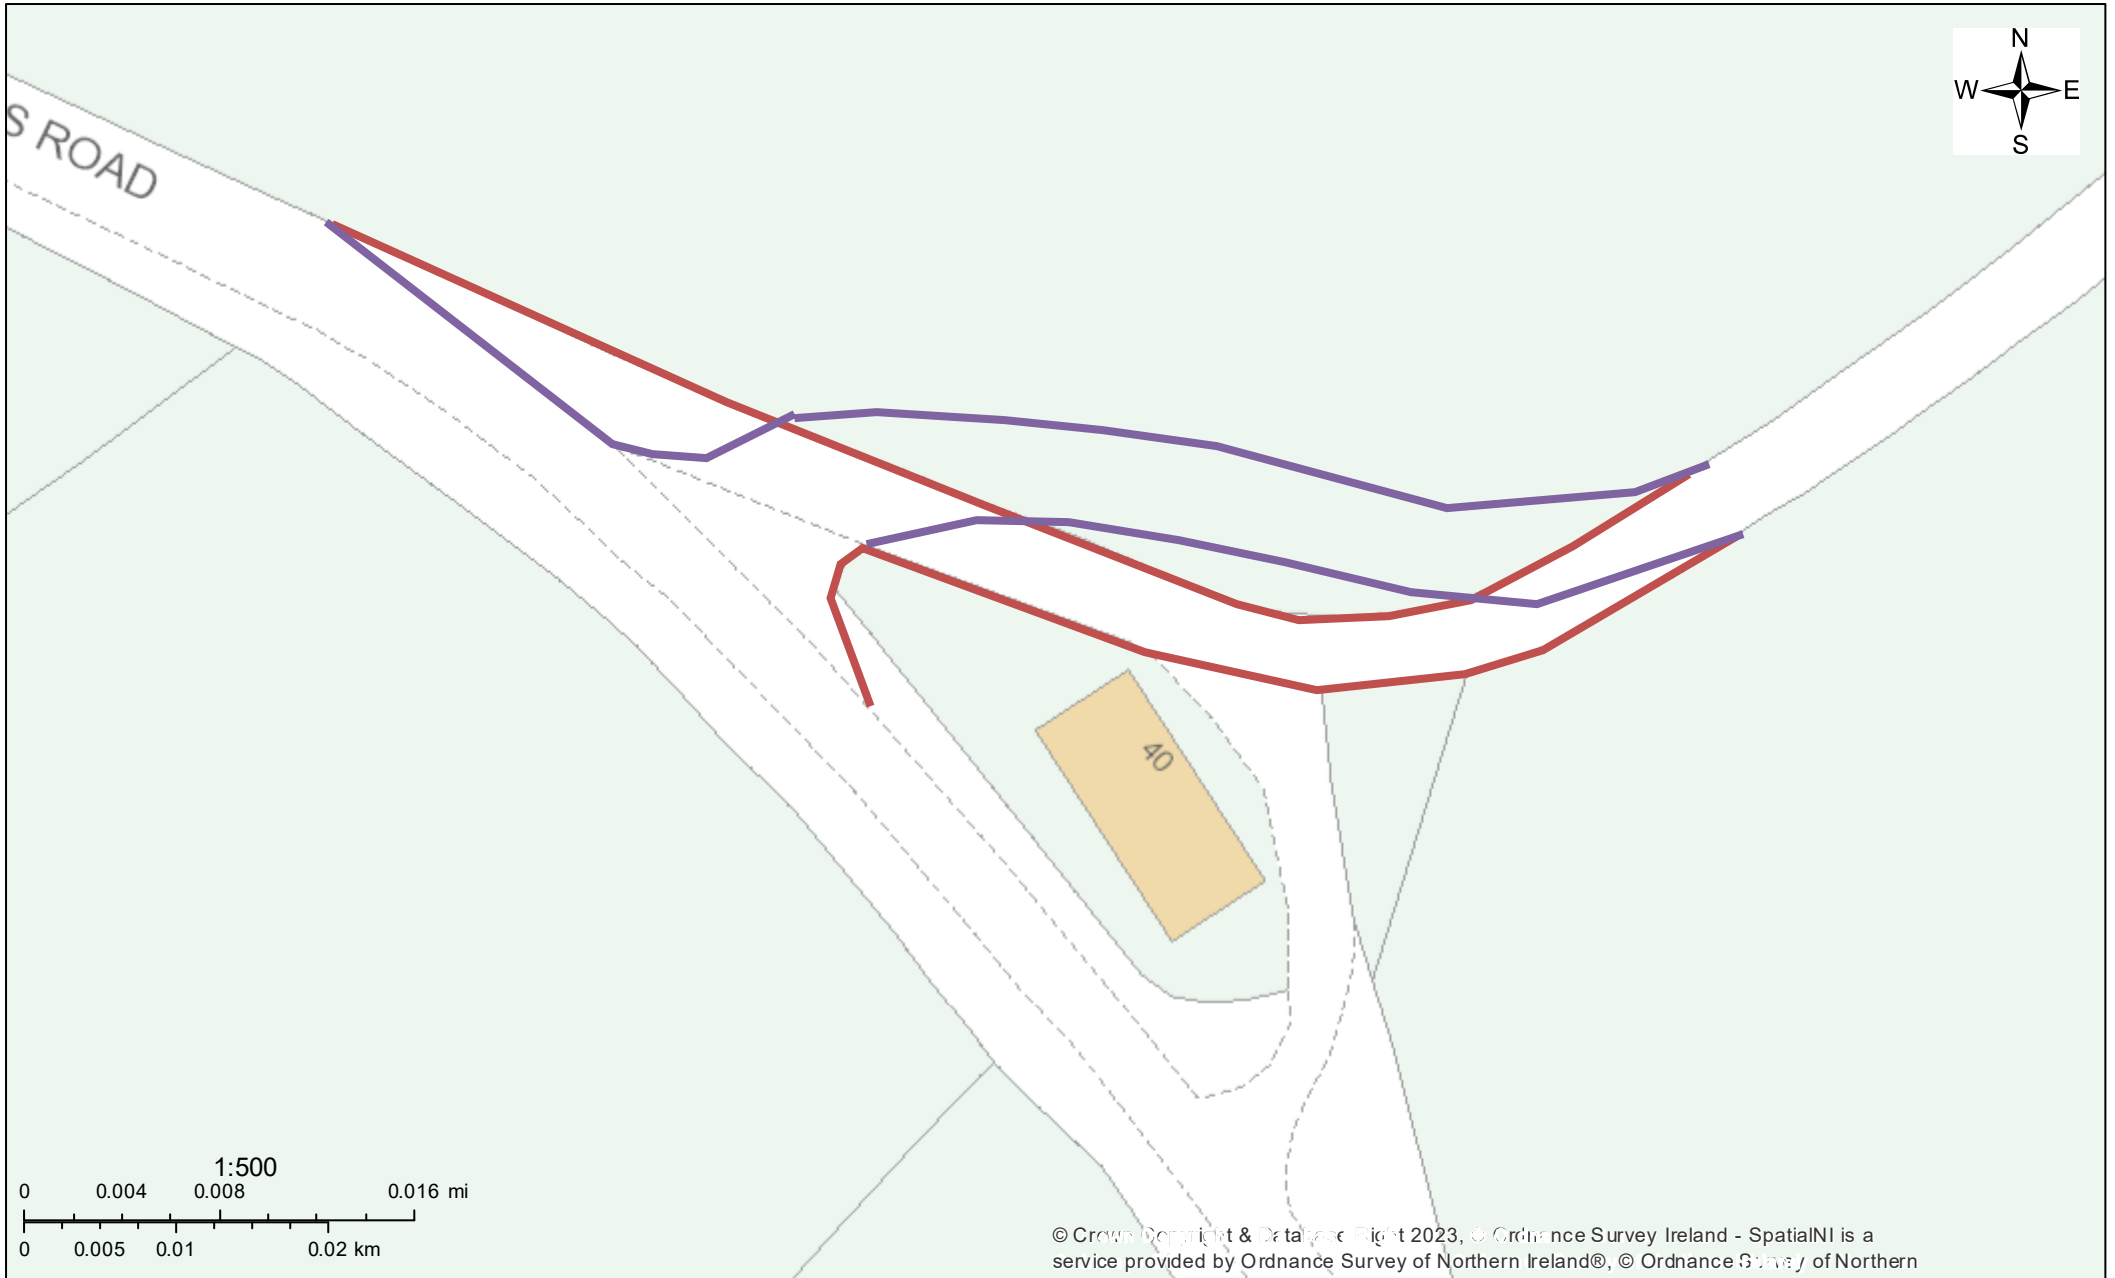

Everything within the red line is potentially ours and would be the cheapest quickest solution.

I think however we will have to for a more traditional 'T' type junction (purple line) and land will be required.

Any questions get the guys to give me a call.

Thanks
Stephen
