Dear Sir or Madam,

RE: Discharge Consent at [redacted]

Thank you for your letter dated the 15th May 2013 referring to the above. From a drainage aspect my comments are as follows.

Rivers Agency consents to your proposal to discharge 60 l/s to the watercourse which is undesignated under the terms of the Drainage (Northern Ireland) Order 1973.

The overflow pipe should be turned in the direction of flow and anti scour measures taken to prevent bank and bed erosion.

The quality of discharge is outside the remit of Rivers Agency and you should seek consent / approval from the Northern Ireland Environment Agency (NIEA) in this regard.

In giving its consent the Agency would stress that it is your responsibility to ensure that the proposed works do not result in any obstruction to flow arising from blockage, structural failure, poor workmanship or any other reasons. Similarly, it is your responsibility to make provision for existing drainage. Moreover, if in the future, another landowner wishes to drain land adjoining this site and within the same catchment he should not be prevented from doing so

This consent is valid for a period of 12 months from the date of this letter. If proposals are not completed within this period of time they should be resubmitted for further appraisal

It is the responsibility of the applicant to seek and obtain necessary permissions to allow such works.

Applicants should note that, in accordance with Para 11 of Schedule 6 of the Drainage (NI) Order 1973, any consent/approvals given by Rivers Agency under Schedule 6 Shall not affect the liability of any applicant to comply with

other legislation relevant to works undertaken in pursuit of such consents/approvals.

Under the terms of Schedule 6 of the Drainage (Northern Ireland) Order 1973 the applicant must submit to Rivers Agency for its consent any proposal to carry out works which might affect a watercourse.

Please quote above reference number in any future correspondence.

Yours faithfully
