Introduction

This Traffic and Travel Information Report is a composite document, comprising the following:

Part 1: Traffic Census data.

Part 2: Information on variation in traffic flows.

The collection of traffic data contributes to the effective management of the road network by providing information that assists in the allocation of DfI Roads' financial resources, the development of future proposals for the network and the planning of Winter Service provision.

In 2015, Traffic data was collected from 351 automatic traffic counting sites located throughout the road network in Northern Ireland. Since then resource limitations have necessitated a reduction in the number of permanent traffic counters, retaining only those that are fully automated. There were a total of 78 such sites operational across Northern Ireland in 2018.

Any enquiries about this report should be addressed to:

PART 1

**ANNUAL TRAFFIC CENSUS REPORT
2018**

General Information relating to Part 1 – Traffic Census

1.1 Part 1 of this report contains detailed information relating to traffic flow collated from the 78 census points with 2018 data on the road network in Northern Ireland.

1.2 These census points are located on both the main and minor road networks.

Information is based on the **best available** data gathered during the course of the year.

Table 2 gives a breakdown of the data available for each site in 2018.

1.3 DfI Roads has historically classified vehicles using the DoENI 5 classification scheme.

This classification scheme was specifically designed for DfI Roads in Northern Ireland and is therefore not directly comparable with any other class scheme used in the rest of the UK and further afield. To ensure the classification data we collect is available in a more widely recognised format DfI Roads have taken the decision to start collecting data using the EURO 6 classification scheme.

As DfI Roads move towards classifying all vehicles using the EURO 6 classification scheme there has been an unavoidable transition period. As a result of this transition period 60 of the sites classified vehicles using EURO 6 and 18 of the sites still classified vehicles using the old DoENI 5 in 2018.

A summary of the two classification schemes are given below:-

DoENI5 CLASS SCHEME

Class 1	Car, Car & Trailer and Light Van
Class 2	Medium Goods Van and Minibus (<8.7m)
Class 3	Rigid Heavy Goods Vehicle (>8.7m)
Class 4	Articulated Vehicle and Rigid Heavy Goods Vehicle & Trailer
Class 5	Bus and Coach

EURO 6 CLASS SCHEME

Class 1	Motorbike
Class 2	Car / Van
Class 3	Car / Van + Trailer
Class 4	Rigid HGV
Class 5	Articulated HGV
Class 6	Bus and Coach

1.4 Percentage HGV (HGV%) for the DoENI 5 Classification scheme is based on Classes 3-5 inclusive and the HGV% for the EURO 6 Classification scheme is based on Classes 4-6 inclusive, (**Note: due to the parameters used in the two different classification schemes the HGV percentages derived from them are not directly comparable**).

1.5 The following notes are intended as clarification of the Traffic Census information contained in Tables 1, 2, 3 and 4.

- (a) Table 1 is included as a “location finder”. The sites are listed in route number order, (i.e. the road classification number).
- (b) Table 2 lists the sites by Census Point (CP) number and gives a breakdown of the data available for each site in 2018
- (c) Tables 3, 4A, 4B and 5 provide the traffic data arranged by Census Point number. These tables also include route numbers and site locations.
- (d) Traffic flow volumes greater than 10 are rounded to the nearest multiple of 10.
- (e) 24 hour Annual Average Daily Traffic (AADT) flows are calculated using data from the 7 day week.
- (f) “Mean Peak Hour Flow” is the average peak hour flow based on a 5 day week comprising Monday to Friday inclusive.
- (g) % HGV is the percentage of the AADT in classes 3, 4 and 5 for sites that use the DoENI 5 Classification scheme and classes 4, 5 and 6 for sites that use the EURO 6 Classification scheme.
- (h) Within the tables the term “Channel” relates to the direction of flow of the traffic.
- (i) Some cells within the tables are marked “-”. This means that either the data was considered to be unreliable, no information was available at that site or the site is unidirectional. Unidirectional sites have a “N/A” in Table 1 to represent the non-existent second channel.
- (j) Maps showing the locations of the census points are included in Appendix B of this report.

1.6 Information relating to sites that are no longer operational but have useful historic data is included in Appendix A.

Table 1 - Site Location Details (listed by Road Number)

This table is included as a ‘location finder’. The sites are listed by route number order, (i.e. the road classification number).

Route	CP No	Divn.	Location	Channel 1	Channel 2	Easting	Northing

Table 3 - 2018 Annual Average Daily Traffic Flow (AADT) (7 day) and Mean Weekday Peak Hour Flows (5 day) – summary of tables 4A, 4B & 5

This table contains the Average Annual Daily Traffic (AADT) flows (7 day) based on traffic flows over the seven day week and the percentage of Heavy Goods Vehicles (%HGV) for each site, (see Tables 4A and 4B for a breakdown by class). The table also contains the weekday average peak hour flows (5 day) and the time that the peak hours commence. The flows are for both directions of travel combined. The sites are listed in order of Census Point Number for ease of reference.

Table 4A – 7 day Annual Average Directional Flows and Percentage Composition of Traffic – EURO 6 sites

The main Vehicle Classification system now used by DfI Roads, (i.e. EURO 6), is shown in the following table. There are six classes as follows:-

Vehicle Class	Description
Class 1	Motorbike
Class 2	Car / Van
Class 3	Car / Van + Trailer
Class 4	Rigid HGV
Class 5	Articulated HGV
Class 6	Bus & Coach

Table 4A contains the 7 day Annual Average Daily Traffic flow (AADT) by direction and the percentage traffic composition of the AADT. The sites are listed by Census Point number.

Table 4A – 7 day Annual Average Directional Flows and Percentage Composition of Traffic

Table 4B – 7 day Annual Average Directional Flows and Percentage Composition of Traffic – DoENI 5 sites

As previously stated, DfI Roads are moving towards classifying all vehicles using the EURO 6 Classification Scheme. As a result of the transition period there are still 18 sites that classified vehicles using DoENI 5 in 2017. The five classes used in the DoENI 5 Classification Scheme are as follows:-

Vehicle Class	Description
Class 1	Car, Car & Trailer, Light Van
Class 2	Medium Goods Van or Minibus (<8.7m long)
Class 3	HGV Rigid (>8.7m long)
Class 4	Articulated Vehicle & Rigid HGV with trailer
Class 5	Bus & Coach

Table 5 – 5 day Directional Flow Information

Table 5 contains the weekday flows (5 day) for both directions of travel and a combined total, where appropriate. The peak hour flows are also given by direction, together with the start time of each peak hour.

The sites are listed in order of Census Point Number for ease of reference.

PART 2

VARIATIONS IN TRAFFIC FLOW

General information relating to Part 2 – Variations in traffic flow

2.1 Tables 6 and 7 provide information on changes in recorded traffic flows over recent years. Table 6 gives the Annual Average Daily Traffic (AADT) (7 day) figures from 2008 - 2018. Table 7 includes percentage changes in traffic volumes (7 day) between 2014 and 2018.

2.2 The following are points of clarification regarding Tables 6 and 7.

- (a) CP 123 – Moneymore Road, Magherafelt: drop in traffic flow due to the opening of the Magherafelt By-Pass in 2017.
- (b) CP 128 – Castledawson – Magherafelt (South West of Bowmans Road): drop in traffic flow due to the opening of the Magherafelt By-Pass in 2017.
- (c) CP 135 – Larne to Ballynure, at Craiginorne: drop in traffic flow due to the opening of the new section of A8 in 2015.
- (d) CP 204 – Greencastle (Junction 2) – Sandyknowes (Junction 4): from 2017 onwards this site has been split into 2 separate sites covering each of the 2 channels, (i.e. CP 204_1 – From Belfast and CP 204_2 – To Belfast). The historic data in Tables 6 and 7 have been amended accordingly.
- (e) CP 392 – Duke Street, Londonderry: from 2017 onwards this site only records data in one direction, (i.e. To Limavady). The historic data in Tables 6 and 7 have been amended accordingly.
- (f) All other cells within Tables 6 and 7 that are marked “-” means that either the data was considered unreliable or no information was available at that site.

2.3 The changes in traffic flows between 2017 and 2018 for the various classes of road are shown in Table 8.

Table 6 - Annual Average Daily Traffic (7 day) from 2008 - 2018

This table contains the Annual Average Daily Traffic flows (7 day) for each site for each year. The sites are listed in order of Census Point Number.

Table 7 – Yearly variations in AADT (7 day) from 2014 - 2018

This table contains the Annual Average Daily Traffic flows (7 day) for each site for each year. The variation between each year for each site is given as a percentage of the previous year’s value.

The sites are listed in order of Census Point Number for ease of reference.

Table 7 – Yearly variations in AADT (7 day) from 2014 - 2018											
C P No.	ROUTE No.	Location	ANNUAL AVERAGE DAILY TRAFFIC (AADT)								
			2014	% + or -	2015	% + or -	2016	% + or -	2017	% + or -	2018

Table 8 - Variation In Traffic Flow (7 day) between 2017 and 2018

The change in traffic flow (7 day) 2017 – 2018 has been calculated for all sites and listed by road classification as shown in the table below. Route A12 (Westlink) was included with the motorway sites as it connects two motorways. The following table shows the findings.

Table 8		
Route type	Change 2017 – 2018	No. of comparable sites
Motorways (incl. A12 Westlink)	0.43	14
A Class routes	0.01	55
B Class routes	-2.07	5
C Class and Unclassified routes	-7.53	1
Overall Total	0.15	75

APPENDIX A

Location Details of Historic Counter Sites

Table 9 - Location Details of Historic Counter Sites (listed by Road Number)

This table is included as a “location finder” for those counter sites which used to be operational but were decommissioned prior to 2017. The most recent data for these counter sites, which are listed below, can be found in the 2016 Traffic and Travel Information Report, (see link below).

<https://www.infrastructure-ni.gov.uk/publications/traffic-and-travel-information-incorporating-annual-traffic-census-and-variations>

The sites are listed by route number order, (i.e. the road classification number).

Route	CP No	Divn.	Location	Channel 1	Channel 2	Easting	Northing
