said they were satisfied with their local public transport services

What would encourage respondents to use public transport more often?⁺

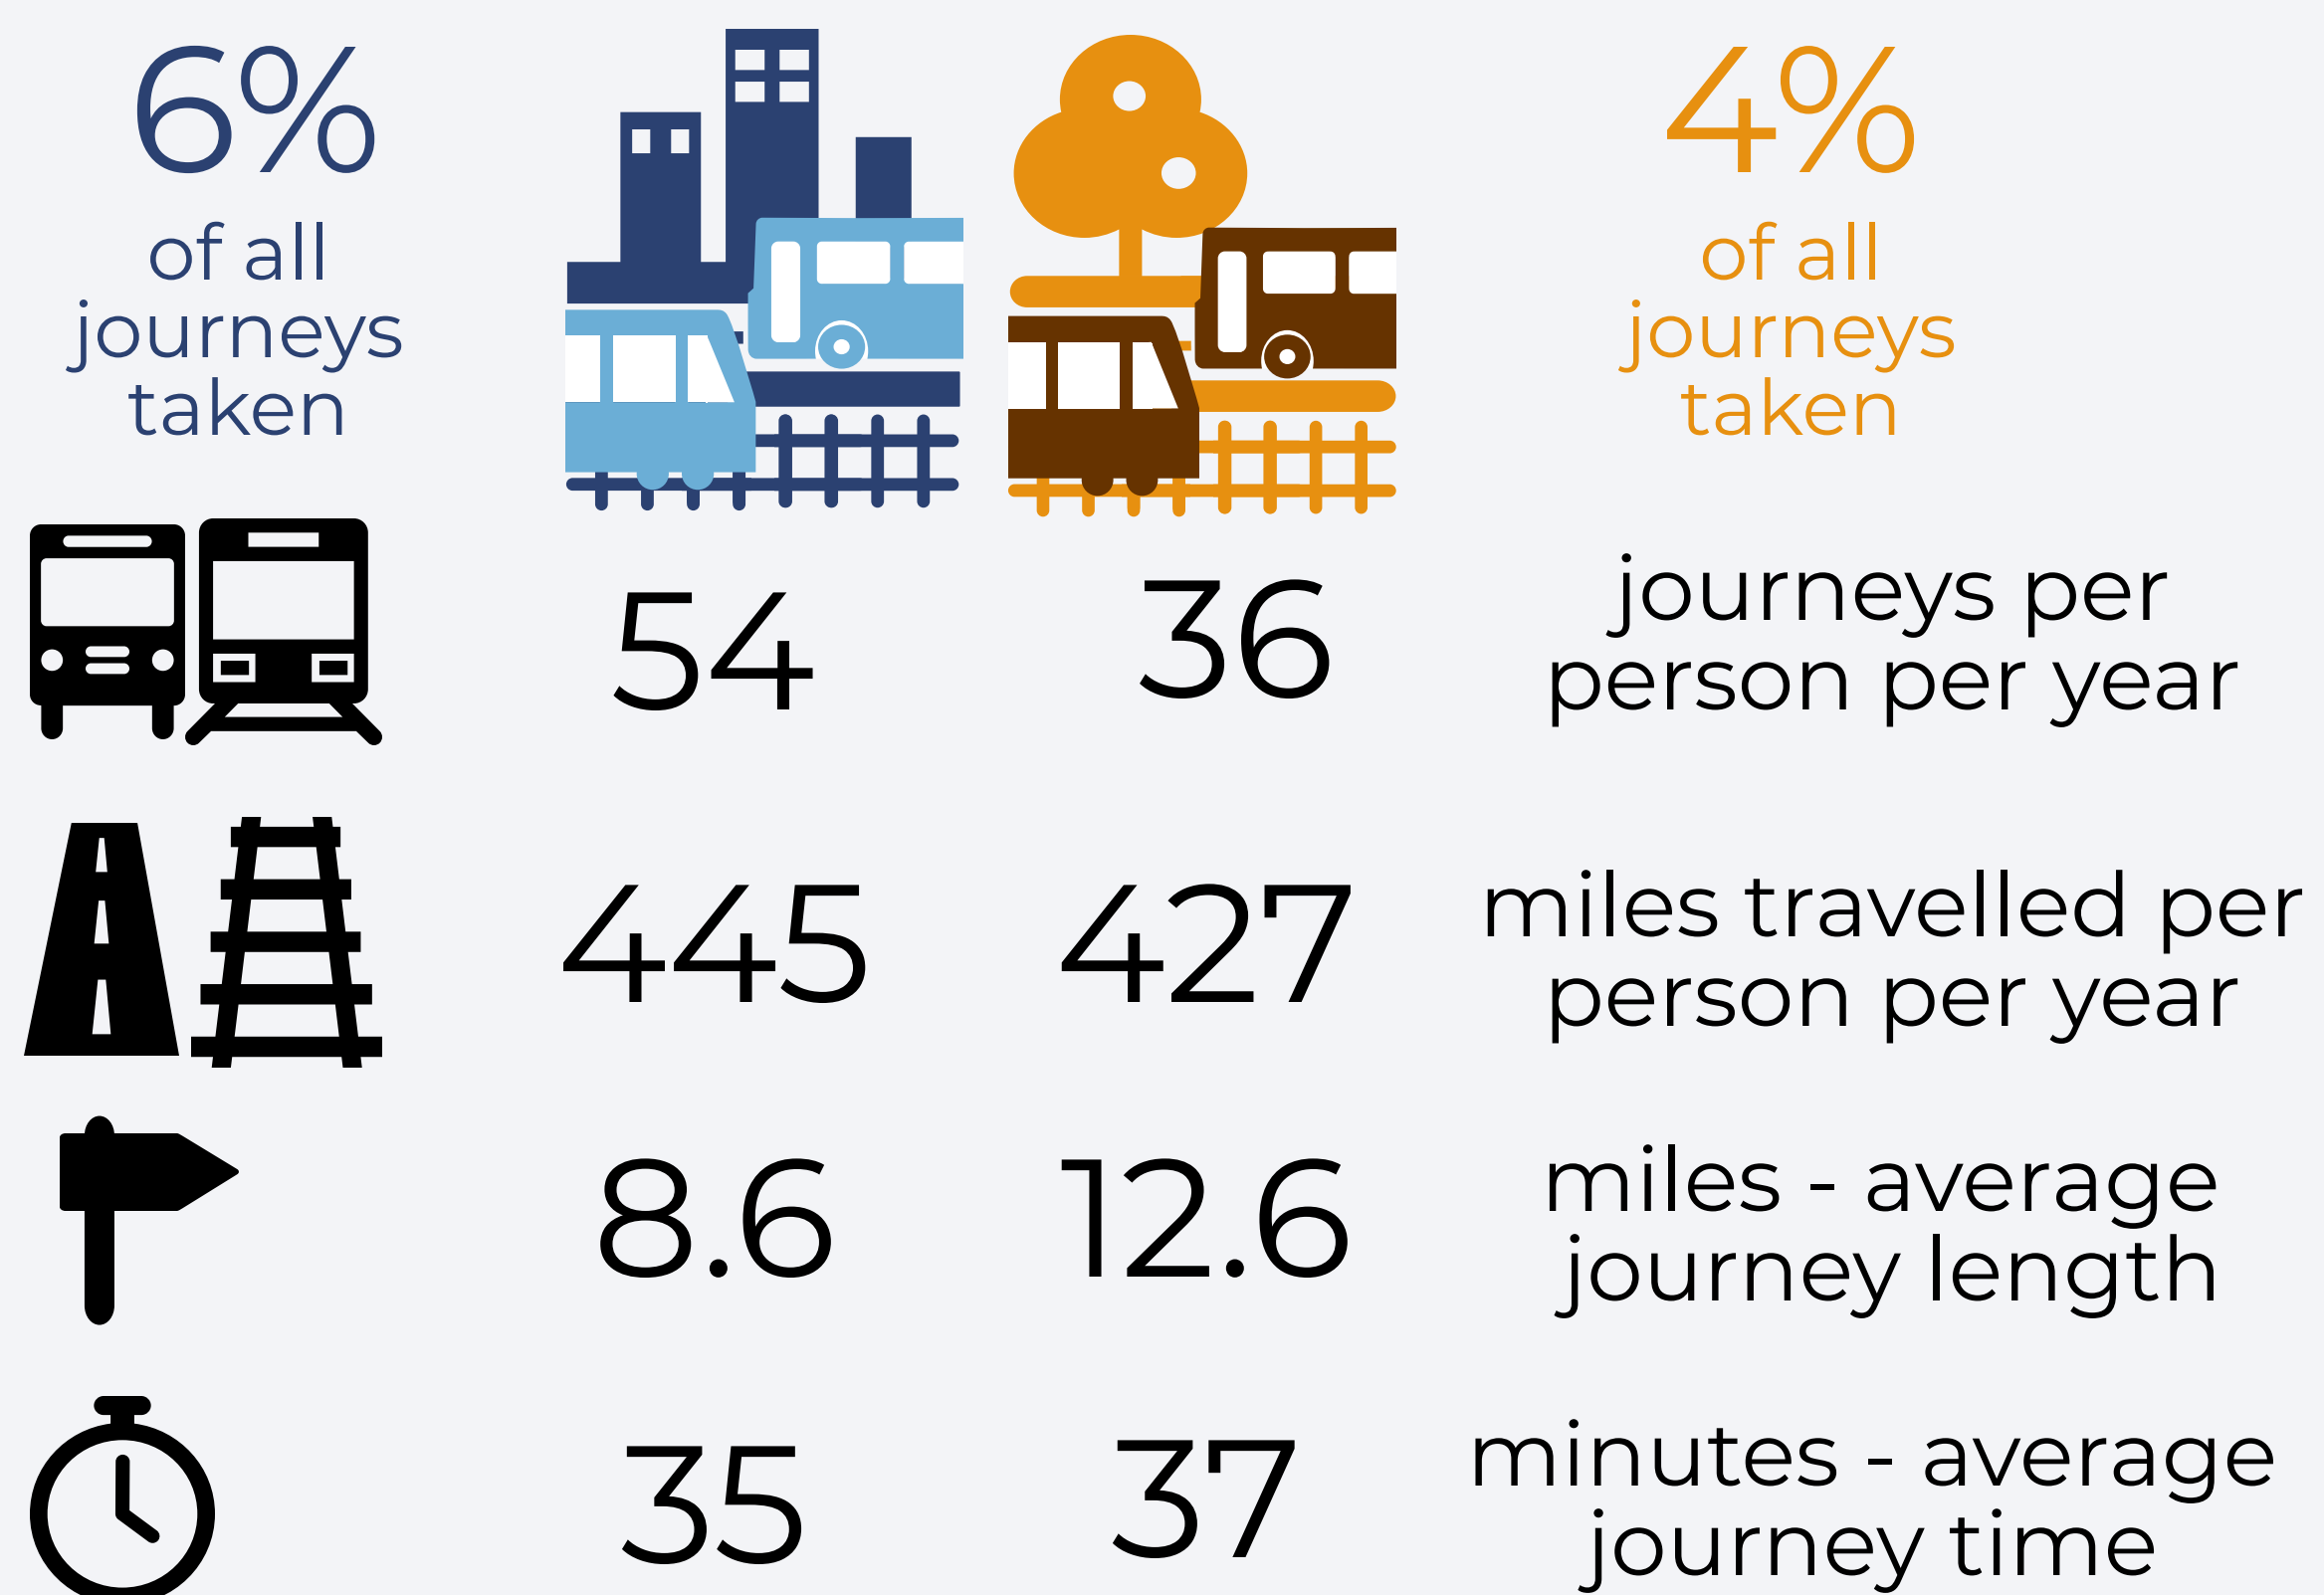

*of respondents who used public transport

Purpose of public transport journeys

Key urban-rural public transport facts*

*Urban-rural information is based on the areas where the respondents live

Public transport in the TSNI

A public transport journey in the TSNI is one where public transport is the main mode in terms of distance. Public transport includes travel by Ulsterbus, Metro, Other Bus, Northern Ireland Railways and Black Taxi. However, for questions marked with a "+" on this page, the term "public transport" is simply used in the survey question and is left to the respondents' interpretation. Distance figures include public transport journeys made as part of any journey. Further definitions can be found in the In-depth report, available at the link below.

About this factsheet

Results in this factsheet refer to 2016-2018.

The next edition (for 2017-2019) will be published after the next in-depth results are released in early 2021.
